LAKE DISTRICT OUTPUT MOVING TOWARD 300,000,000 POUNDS.

Likely to Reach That Figure in Five Year -Heat Affects the Work in Nevada's Big Gold Fields-Alaskan Gold Coming In -Plans of the Utah Copper Company.

HOUGHTON, Mich., Aug. 10 .- Only three successful students of the lake copper business that the ultimate productive capacity of the local mines would be about 200,000,000 pounds a year. This figure was exceeded last year, and will be largely exceeded in 1905, barring serious accidents of an unforeseen nature Not only have the predicted figures of ultimate output been passed, but work now under way assures a still larger increase in the production of the future. Just how large this will prove depends upon a number of factors tost cannot be accurately estimated at the present writing, but there is enough of a politive nature known to afford a sound basis for predicting a steady increase in output for several years to come.

The properties of the district may be divided into five classes, so far as present and future production are concerned, these being as follows: First, the old producing mines: second, the new producing mines; third, the developing mines; fourth, the active prospects, nd, fifth, the inactive mines and prospects. Of the first class, it may be said with safety that practically all of the old mines should at least hold their own in output for the next ve years, and the aggregate production of this group of properties should show an increase rather than a decrease at the end of the five year period.

Of the important old producers the Calumet and Hecla has work under way which should result in increasing its production to approximately 100,000,000 pounds a year within the next few years. With all allowances made for decreasing value and other Calumet and Hecla seems certain. The Tamarack has been a slowly declining property for the last six years. If anything there years. The Quincy should show an increase. The northern end of the mine is showing marked improvement at depth, and the prospects of the property are much brighter than for many years past. Atlantic should about hold its own, as should Wolverine. On the whole it will be found that the old mines of the district show large possibilities for increased production, and may make 30,000,000 more pounds of copper in 1910 than

they will make in 1905.

Among the new mines there are excellent prospects of increased output. The South Range mines, controlled by the Copper Range Consolidated Company, offer the greatest prospects of enlarged production. These three mines, the Baltic, Trimcuntain and Champion, will make more than 10,000,000 pounds of fine copper this year, and each should be making at least 20,000,000 pounds before the close of the present decade, which means that each of these great young mines will be another Quincy by that time, while will mark the ultimate capacity. On the north range, the Mohawk, which is now making approximately 10,000,000 pounds a year, is to have increased capacity, and within five years should be making 16,000,000 to 18,000,000 pounds yearly. The Michigan is another mine that 's quite certain to double or more than double present production, and the Adventure gives promise also of

doubling its output.

Of the developing mines the Allouez and Ahmeek should each be making 10,000,000 pounds or better within five years. Both are producing in a small way at present, carrying drift stopes, which afford a limited tonnage of stamp rock for the mills, it being felt by both managements that the mines should obtain some benefit during the period of development from the very favorable

tonnage of stamp rock for the mills, it being felt by both managements that the mines should obtain some benefit during the period of development from the very favorable cope of development from the very favorable of development from the very favorable of development from the very favorable cope market now ruling. The Superior, lying next north of the Haltic, is a promising property and should be heard from during the management store, lying next south of the Champion of the Champion, is under option to the Copper market continuity to the Champion, which is some the continuity to the Champion, which is so the continuity to the Champion, which is the continuity of exceptional promise. Unfortunately the opportunity of exceptional promise. Unfortunately the continuity of exceptional promise. Unfortunately the continuity of exceptional promise will never a property of exceptional promise. Unfortunately the continuity is a summary to the continuity in the continuit

MONTANA. MONTANA.

BUTTE. Aug. 8.—It is stated on good authority that there were shipped from the Washne smelter in June more than 15,000,000 pounds of copper, and that the July shipment was but little less. As the Washne produces little more than half the copper of the Butte district the total output was in excess of 30,000,000 for each of the two months. The production for August will be lower.

The North Butte Company is shipping ore that runs as high as 100 pounds of copper

MINE PUMPS.

STATION AND SINKING MINING PUMPS.

THE SLOGAN OF THE CAMERION—
"CHARACTER THE GRANDEST THING."
Over 40,000 CAMERON pumps in daily satisfactory use all over the world give tangible proof their merit and confirm the claim for their superiority over all others. They are conceded to be the most durable, reliable and effective mining pumps on the market to-day, and while often indicated are never equalited. For proof, inquire of any mining engineer; for the latest catalog "C" and prices, write any of our reside, it agents or direct to the

to the ton. The success of North Butte has stimulated copper mining in the outside portions of the Butte district and several other big companies are in formation, the purpose being to combine a number of producing mines.

Beveral Butte men have opened a copper mine in Lemhi county, Idaho, and have made a strike of 30 per cent. copper ore.

Senator Clark is building a 350 foot stack at his Butte reduction works. It is being built entirely of cement and has reached a height of 100 feet.

The mines of the Granite Mountain and Bimetallic company at Philipsburg, owned by St. Louis capitalists, have been permanently closed and the property will be dismantied. The two mines had been famous silver producers since 1875, and the gross output of the two had amounted to nearly \$32,000,000, of which more than \$19,000,000 was distributed to stockholders. The mines continued to pay dividends up to 1900, but the earnings since the demonetization of silver have been small. By closing the two mines 250 men were thrown out of employment.

The Minnie Healey mine of the United Copper Company was closed for several weeks on account of a break in the inine shaft, which has been repaired. The mine resumed operations a few days ago. NEVADA:

GOLDFIELD, Aug. 7.—The summer heat has caused considerable slowing up in work, but many new arrivals are recorded every day and there is constant activity in the recording of transfers of claims. All the big mines are turning out ore, but there is very little shipping, as managers prefer to wait-until they can get rail communication. It is estimated that Goldfield's population is now 10,000.

road ore worth \$20 a ton can be hauled with profit.

In the White Horse district De Witt Borce and his associates from Pittsburg recently made a lucky strike in the Ora group, a half mile northwest of Olinghouse. The group is under a \$25,000 bond to Borce, who has also a \$35,000 bond on the Sheehan mine adjoining. The strike was made at a depth of 75 feet and 150 feet from the mouth of the tunnel. The workmen first struck some nuggets and then were amazed to find heavy stringers of quartz that were rearly pure gold. These stringers extended for ten feet across the tunnel. Several were as large as the palm of a man's hand.

SEATTLE, Wash, Aug. 7.—Shipments of gold from the Tanana are coming out by the way of Dawson and Nome, after having a close call from the road agents at Fairbanks and other points along the route. The last shipment, received on Thursday, amounting to \$400,000, came through by way of Dawson without any trouble. There is plenty of water in all the streams and no trouble is anticipated at any of the camps. A mania for railroad construction appears to pervade the entire country, and scarcely a vessel has sailed from the Washington or British Columbia ports but has carried more or less salled from the washington or less railroad material, and at the present time there are four railroads under construction, with from 25 to 100 miles of line completed

and operating.
The Singer-Conrad mines on Windy Arm The Singer-Conrad mines on Windy Arm sent thirty men north yesterday to work on the mines and to construct buildings and the aerial tramway. Besides the men employed on the branch lines of the Yukon and White Pass, a big force has been placed on the main line. The branch is twenty-five miles long, and it is expected that this will be completed this season. It is said by the owners of these mines that they have 35,000 tons in sight at the mines and that they can employ from 500 to 600 men to advantage this fall and winter.

sight at the mines and that they can employ from 500 to 600 men to advantage this fall and winter.

Four canal companies have been formed to construct canals in the Seward Peninsula country. These canals will be from 25 to 35 miles in length and will open up a very rich country that has already produced a great deal of gold. They have been delayed in securing funds, but are now in position to push the enterprises with great energy. In the Atlin and Skagway districts forest firsh have been destroying a great deal of timber and the Government is now employing a force of men to get them under control.

COLOR ADO.

COLOR ADO. COLORADO SPRINGS, Aug. 11.—The Guggenheim Exploration Company of New York has taken the entire issue of \$3,000,000 of bonds made by the Utah Copper Company, composed of Colorado Springs capitalists. Of the issue \$750,000 will be applied to the redemption of a previous issue. The remainder will be applied to the construction mainder will be applied to the construction of a 6,000 ton mill at Bingham, Utah. Work will begin at once and by spring installation of machinery will begin. In connection with the reduction works at Bingham the company will have a total daily capacity of 7,000 tons.

the reduction works at Bingham the company will have a total daily capacity of 7,000 tons.

The Mine Owners' Association is making a strong effort to stop high grading, that rich ore stealing by miners, which it is claimed amounts to \$6,000,000 annually. Several arrests have been made recently.

Ore has been struck in the summit of Alpine Piss which carries 35 to 50 per cent. copper, with pay gold values.

The El Paso drainage tunnel which penetrates Beacon Hill and taps a portion of Raven is now discharging 4,000 gallons of water a minute, against 7,001 when first opened. Water is now standing at an altitude of 8,800 feet above sea level, or about 90 feet higher than the drainage tunnel itself. Mines on the west slope of Beacon Hill are dry to 800 feet depth and on Raven Hill to 600 and 700 feet, while on Gold, Globe and Womack hills the mines are working at 1,000 feet depth without encountering water. By the time the proposed second drainage tunnel is completed, three years hence, at 800 feet greater depth, the El Paso will be dry.

Hearne and associates leasing on the Des Moines on Ironclad and Raven hills are erecting a large cyanide mill capable of treating all the low grade ore in that district.

The new ore shoot opened up in the Portland mine in virgin territory at 1,300 feet depth is yielding from \$200 to \$1,200 a ton. The Shoot is wide enough to insure big returns for years.

The new ore shoot opened up in the Portland mine in virgin territory at 1,300 feet depth is yielding from \$200 to \$1,200 a ton. The shoot is wide enough to insure big returns for years.

The Buena Vista Ore Buying, Smelting and Power Company has been incorporated under Arizona laws to build a smelter at Buena Vista. The company owns patent rights in the United States for a new smelting and power process for heating and reducing ores. The inventor guarantees to produce a heat of 4,555 degrees Fahrenheit in two and a half hours, at thirteen pounds pressure, which usually requires eight hours. Ores containing \$5 a ton values can be treated at a proft. Smelting charges of \$2 a ton will be made. The initial capacity will be 300 tons dails. Charless A Kuenzel is president of the company and inventor of the process. A building site of several acres has been secured a mile north of the business center. A vast tonnage of \$6 ore is immediately available.

The Hamilet Mining Company's new fifty ton mill, four miles north of Silverton, is working satisfactorily, turning out several cars of concentrates weekly for the Durango smelter. The plant's product is first in lead, second in copper, and third in zinc. Later appliances will be installed for handling zinc separately. The Hamilet mine will produce all the ore the mill can bandle until enlarged. The Silver Ledge mine and mill, located at Chattanooga, seven miles northwest of Silverton, is under lease to Kramer & Carmichael, whose first shipment of zinc consisted of two carloads, the weekly output. The mill is equipped with magnetic separators for handling zinc.

The Isabella Mines Company, in which New Yorkers are interested, is pushing development work on the Empire State shaft. The shaft will be sunk 500 feet, or 1,350 in all. The territory is practically new, and rich returns are expected based on developments above the 850-foot level.

New York and Pennsylvania capitalists are interested in an important strike reported in the Russell district, Tippett, Johns & Co., l

The mine has a large amount of low grade:
ore which can be worked very cheaply.
In San Gabriel cañon, Los Angeles county,
S. G. Bragg of Covina, while camping out on
his vacation, discovered a ledge of porphyry
rock which assays \$423 in gold to the ton.
This rich ledge has lain undiscovered for years
within 100 feet of the regular road traveled
by the San Gabriel stage. It can be traced
for several thousand feet.
It is reported that the Dairy Farm coppergold mine in Placer county has been sold to
the Guggenheims for \$250,000. The ore is
extremely rich in copper.
The old Cowboy raine, one of the richest
properties in the Amelie district of Kern
county, has been bonded by the owners toLos Angeles capitalists for \$180,000. The
ores are all base, but the values are so high
that it pays to ship the ore to San Francisco
for smelting.
After years of litigation the rich mines in
Browns Valley, York county, will be worked.
Last week a quitclaim deed was recorded
by one of the contestants to the others, and
work of development will begin at once.
The ledges are extensive and rich in gold.

WASHINGTON.

WASHINGTON.

SEATTLE. Aug. 7.—On Renton street yeaterday men engaged in digging a well for the district school struck pay dirt that assayed well. A number of claims were taken up. Coal has been found, and copper and lead also, but this is the first time the residents have been excited over gold.

Prospectors are making important strikes this season on the headwaters of Lake Chelan, and some splendid copper and silver leads are being opened up. BRITISH COLUMBIA.

they can get rail communication. It is estimated that Goldfield's population is now 10,000.

RENO, Aug. 6.—In the famous De La Marmine near Roche. Nev. has recently been uncovered some of the richest ore ever found in the State. The strike was made on the lowest level, 1,100 feet, below the surface the lowest level, 1,100 feet, 1,100 feet,

FAKES OF THE HUCKLEBERRIES. They Have Plenty of Fun, but the Storm Carries Off Most of Their Clambake.

NEW ROCHELLE, N. Y., Aug. 13.—At their annual burlesque and clambake to-day the members of the New York Athletic Club and the Larchmont Yacht Club presented the "Yankee Circus on Mars" at Huckleberry Island, book by Clay M. Greene and music by the band. A new feature of the circus was the appearance of a man in the ring who impersonated President Roosevelt. He steamed into the island on a launch and was greeted by the tooting of whistles from the yachts and the booming of cannon. He was clad in Rough Rider uniform and wore glasses and teeth. A band of "Huckleberry" Indians escorted him to the ring, and he

"Boys, I am dee-lighted to be with you. I hope you'll have a good time. I'd like to stay to see the show, but I've got to get back to Oyster Bay and patch it up between nations which are unfortunately

Then he mounted a stage horse and dashed off down the hill, where the launch was in waiting for him.

The clubmen saw the circus from benches erected around the sawdust ring. Owing to the hot weather most of them wore bathing suits. The show was preceded by a parade. Capt. Chapman was grand marshal. He was mounted on a wooden charger. The women riders and jockeys rode wooden horses with feather dusters for tails.

appeared made up as a clown. The play-wright made several attempts and then fell off. His nephew, Dr. Greene, who was also made up as a clown, did the real rope walking and then did some sleight of hand

A three round bout, Duchess of Marlborough rules, between amateurs representing the Huckleberry Indians and the Flub Dubs of Larchmont was interrupted, by a shout of "We're pinched; here come the cops!" A man made up as Police Captain Chapman jumped 'into the ring. The yachtsmen always burlesque Chapman because he arrested some of them at the Seeley dinner. The managers of the fight passed the fake police captain a bunch of stage money and he went out in a hurry.

Then the champions went at it again. Between the rounds their seconds rubbed them with sea weed and squirted seltzer in their faces. Just as the show ended and the clambake was announced, a thunder storm broke loose. Some of the clubmen who had on bathing suits were fortunate enough to get a part of the feast, but in a short time the lobsters were submerged and the chickens drifted away. A three round bout, Duchess of Marl-

LAWYERS AIDED BELCHER. Proper Search of Titles Would Have Shown

Him Up Long Ago. PATERSON, N. J., Aug. 13.-A semi-public neeting of the Manchester Building and Loan Association will be held in the gild hall, Haledon, to-morrow night. The meeting is for the purpose of considering the condition of the association. As far as possible a detailed statement will be made of the Belcher stealings on mortgages beld in the association's name, and it is likely which the missing Mayor held continuously for seventeen years, will be named. The meeting will be an interesting one, inasmuch as the board of directors and the officers will be asked to tell how it was that an unbonded officer of the association had the handling of so many of the loans, by which the association members will be responsible for a loss, it is estimated, of \$15,000 or more.

An interesting phase of the mortgage end of Belcher's transactions developed last week. On three pieces of his property he had fourteen mortgages. Nearly all these mortgages bear searches by lawyers certifying that the property was unencumbered. It is held by reputable lawyers that the certification of an attorney as to the noncertification of an attorney as to the nonencumbrance of the property makes him
liable for loss sustained by the mortgagee,
professionally if not legally.

Many of the attorneys who made searches
for Belcher probably took his word for
everything for some of them were defrauded
by Belcher through notes. It is said also
that where some of the searches showed
encumbrances against the property such

encumbrances against the property such indications were erased by the fugitive.

Belcher's crookedness in the mortgage end of his transactions, in which he used a spurious rubber stamp, has made much trouble at the County Clerk's office. Belcher's transactions of the second second

trouble at the County Clerk's office. Belcher's stamp was square and similar to the one used in the County Clerk's office previous to 1897. At the present time a round rubber stamp is being used by the County Clerk. Hundreds of persons with square stamped mortgages have visited the court house to verify the records.

Lawyer Jacob Vanderclock of the Paterson Savings Institution said to-day that as long ago as last year Mayor Belcher asked him to look up all countries where extradition treaties were in effect. Mr. Vanderclock prepared a list at the time, little thinking that Belcher wished to have the information at hand for a contingency.

POTTER TALKS TO CHILDREN

BISHOP TELLS OF THE POWER OF HUMAN SYMPATHY.

The Language of the Hand More Potent Than Spoken Words-Keen Disappointment Because Rain Interfered With Outdoor Meeting-Audience Drenched.

Plans had been made for Bishop Potter to address his first open air meeting under the trees of the Cathedral close of St. John the Divine yesterday, but the rain drove a somewhat wet and bedraggled audience of several hundred persons into the hall of the Cathedral synod house. It was a disappointment to the Bishop that the arrangements were interfered with by the weather, and he told his hearers so.

The open air meetings for summer Sunday afternoons were begun some weeks ago as the result of a long cherished plan of the Bishop, and are maintained largely at his expense, particularly the feature of bringing children from the Chapel of the Epiphany, the former pro-cathedral, down in Stanton street. So he journe ed down on Saturday from Cooperstown, where he is spending the summer and incidentally acting as rector of the Episcopal parish there in the absence of the rector, to see what success was attending the summer services.

By the time the service began the contingent from Stanton street, which yesterday numbered 150 or more, had got a thorough drenching. Nevertheless they were rounded up by several energetic desconesses and led into the synod hall. Some hymns were sung and a brief service said by Canons Paters, Vorheis and Gilliss. Then Bishop Potter made his address, directing his remarks principally to the children. He mentioned what he declared you may term coincidences, if you like, but what I should term rather happy providences."

He told the children that there was singular appropriateness in their presence in the synod hall, inasmuch as it had served as the home of the Leake and Watts Or-

as the home of the Leake and Watts Orphan Asyum.

One of the hymns the Stanton street children sang with particular enthusiasm was "Stand Up for Jesus."

"I can do nething better than to tell you the story of that bymn," said the Bishop. "It was written by a Presbyterian clergyman of Philadelphia, the father of the Rev. Dr. Duffield of this city, I think. He got the theme from the deathbed utterance of a clergyman of this Church, who was driven from his Philadelphia pulpit because of pro-slavery utterances, and who; as he was dying as the result of accident, told those around him to "stand up for Jesus."

Jesus. "What an enormous power the need for "What an enormous power the need for sympathy gives us," concluded the Bishop.
"For what good you and I might exercise
it if we but would. There is scarce a day or a moment that any life beside you or me bas not a heavier task than yours or mine. One word would lighten that task im-

measurahly.

"But beside the spoken word there is the language of signs, the language of the hand, and it is ten times as eloquent as the

"Social intercourse would be similar with the for our sign language, which is almost digreat it necessity among civilized."

Take that back downtown with you with your control of the con "Take that back downtown with you and remember above all things that you, cannot, you must not, build a wall around your own life so that it cannot touch the life next you. Think always, children; how by your uplifting and leading hand you can help other lives, remembering that your Lord, and Master never helped any one without putting forth His hand and touching him."

ENGAGEMENT RIOT FATAL.

The Mother of the Rejected Suiter Dies

of a Bullet Wound.

Mrs. Gatamella Fizzo, 48 years, old, of 451 Carroll street, Brooklyn, one of the six victims of the riot which enlivened the festivities attending the engagement of Mary Masella, 20 years old, to Amato Marros, at 454 Carroll street, on Saturday night, died a few hours after her removal to the hospital. She was shot in the head by one of the numerous bullets discharged

during the fight.

It is thought that her son, Giuseppe Fizzo, 22 years old, the rejected suitor of the Mazella: girl, who started the rumpus, fired the fatal shot. The other five victims
